

900 TERRESTRIAL ANTENNAS

UHF ANTENNA MX, CHANNELS 21/48, G = 15DB

Code : **9000109**

Model : **MX-047**

Description

Quadruple array antennas with very high gain. Designed to cover the UHF band up to 694 MHz while rejecting the LTE700 and LTE800 mobile telephone band. Fast and easy assembly, all the components are pre-mounted and do not require tools for their assembly.

Applications

Digital and analogue terrestrial TV installations, collective or individual, where rejection of the LTE700 and LTE800 band is necessary and high gain and directivity are required. The reflectors avoid interferences received from behind.

Characteristics

Rejection of LTE700, LTE800 and GSM signals as well as signals coming from the bottom of the antenna. Robust antenna with great resistance to both sun and saltpetre. Made from aluminium, weather-resistant plastics and galvanised steel. Large size reflector, elevation angle adjustment, mounting in either horizontal or vertical polarity. Includes a balun (symmetrizer), specially designed for the antenna, with F-type connector protected inside the balun box. Packed individually.
