BROADBAND AMPLIFIERS

INDOOR AMP TV+IF 4 OUTPUTS DC PATH

Code: 9040075

Model: AI-414

Description

Broadband apartment amplifier for terrestrial and satellite TV for installation with multiswitches, with 4 inputs and built-in powern supply unit. It amplifies the terrestrial TV and IF satellite bands separately. It has an independent gain control for each band and a fixed slope on the FI band.

Applications

Designed to enlarge analogue and digital terrestrial and satellite TV installations within an apartment or house. It amplifies the terrestrial and satellite TV signals from the output of the multiswitch so a distribution with TV-SAT outlets can be made. The levels are easily adjusted by means of the two built-in gain controls.

Characteristics

Made from ABS plastic, with an internal zamak chassis which gives maximum shielding. The power supply unit is insulated from the rest of the high frequency circuit. Fixed to the wall by means of the supplied screws and wall-plugs. F type connectors.
