

# 913 MULTISWITCHES

## 9X20 CASCADABLE MULTISWITCH

Code : **9130332**

Model : **ML-0920**

### Description

Cascadable multiswitches for 8 polarities and terrestrial TV with 20 outputs. The outputs are amplified in the satellite IF band. Need to be powered from each individual receiver so that the switching and amplification of each derived output will function.

### Applications

Medium-sized collective satellite and terrestrial TV installations. It is essential that they be mounted along with end multiswitches, so as to obtain distributions of up to 128 outlets on a single line if they are installed with intermediary amplifiers.

### Characteristics

Shielded metal chassis with plastic supports. F-type connectors. Earthed.
